PREFACE

An up-to-date Index of the Society's publications is long overdue. The only Index to the Society's *Journal and Proceedings* was published in 1885 in the Centenary Volume. It covers the period up to 1883.* The proposed scheme is a more extended one, as it not only brings the Index of the *Journal* (inclusive of the Index in the Centenary Volume) up to date but also covers all publications of the Society since its inception. The scheme, as outlined below, is framed in such a manner as to satisfy all possible enquiries.

Volume I

Part 1

Introduction.

Author-Index to *Asiatick Researches, Journal* (three series up to 1953),
Memoirs, and Miscellaneous Publications.

Part 2

Index of *Bibliotheca Indica* and *Monographs* (publications arranged alphabetically).

Author-Index to Notices in the Proceedings.

List of Plates.

Analytical Classified Index.

Volume II

Subject-Index

Religion and Philosophy.

Language and Literature.

History and Social Sciences.

Art and Archaeology.

Anthropology.

Science.

Miscellaneous.

S. CHAUDHURI

* In 1837, James Prinsep brought out a very carefully prepared analytical index of the first 18 volumes of the *Asiatick Researches*. In 1856, Raja Rajendra Lala Mitra's index to the last two volumes of the *Asiatick Researches* and the first 23 volumes of the *Journal of the Asiatic Society of Bengal* was published.

VOLUME 1

PART I

INTRODUCTION

Sir William Jones, a newly appointed Puisne Judge of the old Supreme Court at Fort William in Bengal, landed at Calcutta in September, 1783. During his long voyage from England to India while on the Arabian Sea a train of reflections on the 'eventful histories and agreeable fictions of the Eastern World' crossed his mind and these reflections of a master of several oriental languages took shape in the institution, on January 15, 1784, of the Asiatic Society to investigate within the geographical limits of Asia whatever is performed by man or produced by nature. In the inaugural address delivered by Sir William Jones on the occasion he chalked out the object of the Society as 'enquiry into the history and antiquities, arts, sciences and literature of Asia' and it was agreed that 'in the infancy of the Society there ought to be no confinement, no trouble, no expense, no unnecessary formality'. It was decided to have weekly meetings for the purpose of hearing original papers read on such subjects as fall within the Society's enquiries and to invite all curious and learned men to send their valuable tracts to the Secretary for publication as *Asiatick Miscellany* towards the end of each year.

During the first few years, however, no such publications could be taken in hand. The Society having no funds of its own at the time Manuel Cantopher of the East India Co.'s printing office undertook such a publication as a private speculation and the first volume was brought out in 1788 under the title *Asiatick Researches*, instead of what the founder had contemplated. By 1797 five volumes came out and were warmly received in the literary world. They made such a name and fame that editions of it were brought out in different countries of Europe, including a pirated edition in England in 1798. The reception which the first five volumes met with induced the Society to bring out the *Asiatick Researches* on its own account from 1798. In 1829 it was decided to divide the *Asiatick Researches* into two parts: one for scientific and the other for literary communications and the plan was carried out in vol. 17 (1832) to vol. 20 (1839). This publication ceased after the 20th volume in 1839 and the Society formally dropped it in 1842.

The form of the *Asiatick Researches* was not suitable for short but interesting and learned communications on new and important discoveries and ideas which were necessarily left out. For a time these found a place in the *Quarterly Oriental Journal*, started in 1821 by Dr. H. H. Wilson, and in the *Transactions of the Medical and Physical Society*. Both the publications were, however, dropped in 1827.

Captain J. D. Herbert's monthly journal, *Gleanings in Science*, which appeared in 1829, superseded the above two Journals. The Society gained the privilege of having the précis of its monthly proceedings, which had heretofore been preserved in manuscripts, regularly published in this *Journal*.

In 1830 when Captain Herbert left Calcutta, James Prinsep took up the responsibility to continue to get out the publication in a new character and under a new name, *The Journal of the Asiatic Society*. The sanction sought for was given on March 7, 1832, and the first issue of the *Journal* appeared in March, 1832, under the title of *The Journal of the Asiatic Society of Bengal*.

Thus in its new character, it became the organ 'to give publicity to such oriental matter as the antiquarian, the linguist, the traveller and the naturalist may glean, in the ample field open to their industry in this part of the world (i.e. Asia), and as far as means would permit, to the progress of the various sciences at home, especially such as are connected in any way with Asia'. (J.-1832-Preface.)

The Government conceded the privilege of franking through the Bengal and Bombay Presidencies and Ceylon (J-I-IX), in consideration of the publication of Dr. Buchanan-Hamilton's *Statistics of Bengal* as an appendix to it. The *Journal* was given gratis to members for the first two years.

The frequency and regularity of its publication was a great advantage and many papers, otherwise reserved for the *Asiatick Researches*, were diverted to this *Journal*. Thus *de facto* recognition was accorded to it as an organ of the Society, which was ultimately to supersede the *Asiatick Researches*. James Prinsep left Calcutta in 1838. It was in the conduct of this *Journal* that the amiable and good qualities of the man were most apparent, and of most benefit to the public. His own labours were the grand stay, the glory, and the honour of the *Journal*. After his retirement the situation came to such a pass that at the close of 1842 the *Asiatick Researches* had to be finally dropped and the *JASB* was officially taken over by the Society. In 1865 the *Journal* was again divided into two parts, *Letters* and *Science*, as was done in the case of *Asiatic Researches* in 1829. The arrangement was discontinued in 1905 to be revived again in 1935.

From the year 1893 to 1904 a third separate section dealing with anthropology, ethnography and folk-lore was added to the *Journal* of the Society.

The Council appointed a Sub-Committee in 1905 to consider the style, paper and design of the Society's publication. The Committee recommended 'the establishment of a quarto publication, *Memoirs*, for the larger memoirs, the residue of small papers can be conveniently published in a single Journal styled the *Journal and Proceedings* of the Society' and also 'to facilitate the system of publishing papers, and to avoid the delay often caused by reference to Council, in accordance with the standing regulations, the Committee recommended that all arrangements with regard to the publication of papers be made by a standing Publication Committee, composed of the Editors of the *Journal and Proceedings* and that this Committee be given the powers now resting with Council, except when the publication of a paper involves expenditure beyond the sanctioned grant'. The recommendation of the Sub-Committee was accepted. *Numismatic Supplement* was a feature of the *Journal (Letters)* up to the year 1938. *Bibliographical Supplement* to the *Journal (Letters)* was introduced in 1950.

PROCEEDINGS

Ever since the inaugural meeting held on January 15, 1784, the records of every meeting are being regularly kept and these manuscript proceedings constitute invaluable documents for the history of the Society. With the institution of the *Journal* in 1832 a précis of the proceedings was included in the *Journal* and before that in the *Gleanings in Science* which started in 1829.

In 1865 the *Proceedings* was separated from the body of the *Journal* to contain the précis of the Society's proceedings and short notes. In September 1934, it was decided to publish a new monthly periodical under the title, *Advance Proceedings and Notices*. It ceased to exist in 1936.

In 1946 it re-appeared under a new title, *Monthly News Bulletin*. Only four numbers of the Bulletin were issued.

From 1832 to date this *Journal* had passed two stages of its career, and entered its third in 1935.

1st Series: *Journal* : Vols. 1-74: 1832-1904.

 Year Book: Vols. 1- : 1935- . }

ORIENTAL PUBLICATIONS

The first scheme came from the Brethren of the Baptist Mission at Serampore for publication of a series of Sanskrit works with translations. It was considered in 1806 (May 15, 1806) by the Committee of Papers and the aid and patronage were extended to the missionaries for a single work, the translation of the *Rāmāyaṇa* (July 3, 1805). On October 7, 1807, the text of Sāṅkhyā was also selected. But the patronage was withdrawn after the publication of the first three volumes of the *Rāmāyaṇa* and the idea was abandoned.

On July 2, 1806, the Society considered a scheme prepared by Sir James Mackintosh, the President of the Literary Society of Bombay, for regular publication of Sanskrit texts and it was resolved to 'publish from time to time, as their funds will admit of it, in volumes distinct from the *Asiatick Researches*, translation of short works in the Sanskrit and other Asiatic languages, or extracts and descriptive accounts of books of greater length in those languages, which may be offered to the Society and appear deserving of publication . . . and the series of vols. be entitled *Bibliotheca Asiatica*, or a Descriptive Catalogue of Asiatic Books, with extracts and translations'.

But the resolution was not given effect to beyond the aid granted to private individuals for oriental publications.

In the year 1835 the Government prohibited the publication of any oriental works at the expense of the fund, which had been set apart under the Charter Act of 1813 to be applied in part to the revival and improvement of literature and the encouragement of the learned natives of India. It was further directed that the printing of the whole of the Oriental Works then in progress under the auspices of the General Committee of Public Instruction with the two exceptions, i.e. (i) *Fatāwa Alamgīri*, and (ii) a treatise on spherical Trigonometry (Arabic), should be immediately suspended, and printed sheets be sold as 'waste paper'.

There was a lengthy discussion in the Society on May 6, 1835, as to the propriety of the measure—'so unjust, unpopular and impolitic an act, which was not far outdone by the destruction of the Alexandrine Library itself'. A Special Committee was appointed with W. H. Macnaughten, W. H. Mill, James Prinsep, and Ram Komel Sen to draw up an urgent memorial, avoiding to the utmost all controversial points. The draft memorial, begging that the obnoxious order might be rescinded, was adopted *nem con* after certain improvements and was transmitted to the Governor-General in Council under the signature of the President, Sir Edward Ryan.

The Government declined to accede to the Society's request, but offered 'to make over all the unfinished oriental works either to the Asiatic Society or to any Society or individuals who may be disposed to complete

them at their own expense'. With the reply of the Government the pleasing dream had vanished. However, the Society decided to accept the offer and proceed to complete them¹ proposing at the same time to undertake the publication of a fresh series as soon as this part of their task was accomplished. A Committee was also appointed to draw up a memorial adopting the most conciliatory and most effectual means of attaining the end, to the Court of Directors and Board of Control. It was forwarded to the Court of Directors through the local Government, in which the Society expressed their assurance that if the Court deemed it 'inexpedient to alter the appropriation of the Parliamentary Fund, which the local Government had determined upon, they would desire some other means of continuing that encouragement to the cause of Asiatic literature which reflected honour on the hand that dispensed it', and the memorial proceeds to ask for 'pecuniary aid in the expense of publishing standard and useful works in Oriental literature'.

Professor H. H. Wilson, then the Agent in England for the Society, succeeded to prevail upon the Court of Directors to concede to the prayer under certain conditions to recommend to the Government of India to appropriate funds to the preparation and publication of Oriental works and works on instruction in the eastern languages. The Fund was placed at the disposal of the Society.²

But the grant thus received could not be judiciously spent in conformity with the intentions and encouragement of the Court of Directors due to the conspicuous absence of James Prinsep due to ill health which compelled him to leave for a change. But death cut him away from this world leaving his mission unfinished.

BIBLIOTHECA INDICA

In 1847 a Committee was appointed to devise ways and means to carry out the Court of Directors' wishes as to the publication of the Veda. The recommendation was sketched in a judicious minute by Mr. J. W. Laidley (December, 1847), to start a monthly serial Journal under the title *Bibliotheca Indica* and the work was taken in hand at the beginning of 1848. The Editorship of the project was entrusted to Dr. E. Roer on a salary of Rs.100 p.m., whose principal duty was to supply English translation of the works already taken in hand.

But the project fell through before the 4 fasciculi of the *Saṃhitā* of the *Ṛg-Veda* could be published, as the news arrived that the Court of Directors had decided to get them done by Dr. Max Müller and Dr. H. H. Wilson.

At the close of 1850, the Council appointed a Sub-Committee to report on the expediency of introducing further changes into the management of the publications, and acted on the recommendation 'to abolish the post of the

¹ The works abandoned were all completed with the exception of (i) *Sāriravidyā* and (ii) treatise on Algebra.

² In support of the memorial of the Society to the Court of Directors, sent on September 2, 1835, Professor Wilson addressed two letters to J. C. Melvill, Financial Secretary to the Court of Directors. His first letter dated March 5, 1837, from Oxford which caused impediments to the Court's compliance with the memorial, had been skillfully removed by his second letter dated November 26, 1837, from London. The Court in their Despatch No. 8 of 1838 authorized (under certain conditions) the Governor of the Presidency of Fort William in Bengal 'to devote a sum not exceeding five hundred rupees a month' (as suggested by Professor Wilson) 'to the preparation and publication of Oriental works, etc., either through the medium of the Asiatic Society, or any equally appropriate channel'.

chief editor, remuneration of editors according to the nature of the work done, and no work should be printed without so much critical apparatus as is necessary for giving an account of the MSS. made use of, their authority and age, etc., and a résumé of the contents of the volume (J-XIX-629)'. It gave a fillip to the distinguished scholars Pandit Iswar Chandra Vidyasagar, Dr. A. Sprenger, and J. R. Ballantyne, and several valuable works were taken in hand. But for the limited resources at the disposal of the Society, it became necessary to put a stop to the publication of the series after five years in order to pay off arrears.

Adverting to the excess of expenditure over income, the Court of Directors remarked : ' This augmented activity and enhanced expense arise especially from the great impulse given to the publications of Mohammedan literature and the Arabic language . . . When we authorized the appropriation of a special grant to the encouragement of Indian literature, we had in view especially the literature of the Hindus, although we do not propose to exclude Mohammedan literature of local origin or interest; but we certainly did not contemplate a voluminous and costly publication . . . of the literature of Arabia and not at all that of India.

We therefore direct that the encouragement of such works be hereafter withheld.' (Despatch No. 41, dated May 18, 1856, published in *JASB*, 1856, pages 427-428.)

Similar communication was received from Dr. Wilson giving strictures upon the choice of works selected for the *Bibliotheca Indica* Series ' which is becoming more of a *Bibliotheca Arabica*, than a *Bibliotheca Indica*, inconsistent with the intention of the *Bibliotheca Indica*, which was to furnish scholars with books to read, not to provide students with the means of learning to read them.' (August 17, 1855.)

Henceforth the Society acted upon the principles outlined by the Court of Directors. The grant for publication was now divided into two distinct parts: (i) Semitic works, and (ii) Sanskritic works. In 1868 W. Stokes, then Legal Member of the Supreme Council, who, while accepting the propriety of it, remarked that, in view of the vast extent and paramount importance of Sanskrit literature, and the little that has yet been done towards its preservation, the amount devoted to it was very small, and recommended it to be doubled. The Government approved of his suggestion and an additional amount of Rs.250 p.m. was exclusively granted for Sanskrit works.

MISCELLANEOUS PUBLICATIONS

On October 5, 1803, the Society mooted the idea 'to bring to light the treasures of Sanskrit lore buried in private libraries or collections in India'. A memorial was submitted to the Government on July 1, 1807. But the Society had to wait the arrival of the Government of Lord Lawrence who took up the idea warmly and acted upon the recommendations of W. Stokes. Thus the dream of the Society, 'to furnish to the literary world as much information as is needed in particular branches of Indian knowledge', was fulfilled in the copy of the *Notices of Sanskrit MSS.* completed in 15 vols.

In 1946 in connection with the bicentenary celebrations of the birth of Sir William Jones (1746-1946) the Council resolved to open a new series under the title *Monographs*, on special subjects. Before 1905 monographs on special subjects used to publish as Extra Numbers to the *Journal* of the Society.

In the same year a scheme was prepared for the publication, in popular forms, of a series of books relating to certain important aspects of the cultural life of India. The initial steps which were taken in this direction

were due to the generosity of Dr. B. C. Law through whose help it had been possible to publish a number of the opening addresses delivered at the Society's discussion meetings, under the title *Introducing India*.

In 1947 the Society started 'the publication of independent, self-contained *Bulletins* with a distinctive format and at a cheap price, to furnish facilities for quick publication of suggestions likely to lead to the development of the natural resources of the country and the amelioration of the condition of the average citizen of India'.

The Society did not only limit its efforts for the publication of Oriental works; scientific and literary works taken in hand in India always found ready support from the Society.

During the last 170 years (1784–1953), the Society fulfilled the desire of the illustrious founder of the Society and contributed to the advancement of knowledge with reference to the East, particularly India. The publications of the Society have established a reputation and the Society has hitherto admirably accomplished the purpose for which it was set on foot. The section may be concluded with the appropriate comments made by the founder, Sir W. Jones: 'It will flourish, if naturalists, chemists, antiquaries, philologists, and men of science, in different parts of Asia, will commit their observations to writing, and send them to the Asiatic Society at Calcutta; it will languish, if such communications shall be long intermitted; and it will die away, if they shall entirely cease.'

PREFACE

In December 1956, part 1 of Volume I of the Index to the publications of the Society was published. It included author-index to *Asiatick Researches, Journal* (three series up to 1953), *Memoirs* and Miscellaneous Publications. In part 2 of Volume I, presented here, the following publications have been indexed :—

Bibliotheca Indica Series.
Monograph Series.
Proceedings and Year-Books.
Miscellaneous notes in the Journal of the Society.
Miscellaneous publications.

The third part of Volume I will contain: (1) List of plates, (2) Addenda and corrigenda, and (3) Analytical classified index.

In Volume II the publications indexed in Volume I will be published according to their subjects under the following heads :—

Religion and Philosophy.
Language and Literature.
History and Social Sciences.
Art and Archaeology.
Anthropology.
Sciences.
Miscellaneous.

In spite of our best efforts, a few articles and works might have escaped our notice. If these are brought to the notice of the editor of the publication, they will be included in the third part of Volume I of the Index with due acknowledgements.

2. THE BIBLIOTHECA INDICA SERIES

[The Bibliotheca Indica is a collection of works belonging to or treating of Oriental literatures and contains original text-editions as well as translations into English, and also grammars, dictionaries, bibliographies, and studies.

The publication was started in 1849, and consists of an Old and a New Series. The New Series was begun in 1860, and is still running.

As a rule, the earlier issues in the series consist of fascicles of 96 or 100 pages print, but at present the numbers are issued in larger bulk, and as much as possible in complete volumes under a single issue number. Several different works are always simultaneously in progress. Each issue bears a consecutive issue number. The Old Series consists of 265 issues; in the New Series, till 1953, inclusive, 1,567 issues have been published. These 1,832 issues represent 277 different works; these works again represent the following literatures :—

Sanskrit, Prakṛt, Pāli.

Rājasthānī, Kāshmīrī, Hindī, Bengali.

Tibetan.

Kui.

Arabic, Persian.

Several works published are partly or wholly sold out, others are still incomplete and in progress. A few works, though incomplete, have been discontinued.

The standard sizes of the Bibliotheca Indica are three :

Demy (or small) octavo.

Royal (or large) octavo.

Quarto.]

In the following pages (339–356) titles of the Oriental works (text and translation in English) published in this series have been indexed in alphabetical order, irrespective of their languages. A language-wise index of these works will be given in part III of this Volume.

The index have been arranged as follows :

- (1) Serial Number, (2) Title of the work, (3) Name of the Author,
- (4) Editors and Translators, (5) Name of series, (6) Work Number and (7) Years of publication.
